

Hill Organ at All Saints Church, Hove

Restoration of the organ in All Saints Church, Hove, built by William Hill and Sons in 1905. It is one of the most magnificent instruments ever constructed by Hill and Son, has survived intact with three keyboards, pedals and 48 speaking stops or ranks of pipes. It has a double-fronted Gothic case designed by F L Pearson, the son of the church's architect, J L Pearson RA (architect of Truro Cathedral) which is regarded as one of the best case designs of the 20th century.
